Taxes on products, net	297	305	314						
Gross value added ⁵⁾	1,925	1,991	2,065	1.5	1.6	1.4	0.7	1.8	2.2
- Non-farm private sector ^{4) 5)}	1,302	1,355	1,413	2.6	2.1	2.0	-0.1	1.9	2.3
Gross national income	2,269	2,342	2,424						

Note: The division into volume and price components is made on the basis of a fixed price calculation in the previous year's prices. The figures state the annual percentage change.

1) The volume statement for public consumption is calculated by using the input method. In 2018-2020 growth in public consumption using the input method is assumed to equal growth using the output method.

 Public investments are excluding general government net purchases of buildings, and therefore the figures will deviate from public investments in table B.6.

3) The volume figures reflect changes in inventories compared to GDP.

4) Non-farm private sector consists of manufacturing, construction and private services excl. sea transport.

5) The volume statement in 2018 is adjusted on a discretionary basis for a large one-off payment in the 1st quarter of 2017 for use of Danish-owned intellectual property rights. Thereby, growth projections are in line with the underlying growth.

Total, incl. SU and pensioners	2,116	2,112	2,108	2,087	2,074
Subsidised employment ⁷⁾	78	80	87	90	93
Total, incl. SU, pensioners and subsidised employment	2,194	2,192	2,194	2,176	2,167

Recipients of education assistance benefit, the special education benefit and other temporary benefits (kon-Note: tantydelse) are included as cash benefit recipients.

From 2018 and onwards, a new method of projections for recipients of unemployment benefits is applied. 1) The new method causes a minor upward revision of the forecasts on its own.

The data do not cover persons in subsidized employment and thereby differs from other register-based da-2) ta and table B.4. Furthermore, both labour market ready and non-labour market ready cash benefit recipients are included in the group of recipients of unemployment benefits and cash benefits in activation schemes.

Anticipatory pension and old age pension include pensioners living abroad as well as pensioners, who are 3) employed.

4) Excl. persons on revalidation with wage support.

The number of sickness benefit recipients does not reflect the total absence due to illness. It includes the part of the sickness absence, which is not covered by the employer. Specifically, this covers sickness ab-5) sences longer than 30 days as well as sickness among the unemployed. 6)

Excl. recipients of integration benefits with wage subsidies.

Includes persons in employment with wage subsidies (including flexi-jobs and sheltered jobs). Statistics Denmark, DREAM and own calculations. 7)

Pension wealth ⁶⁾	2,323	5.5	6.0	1.7	0.9	0.4	0.2
Total net wealth ⁵⁾	6,164	4.8	3.7	4.7	2.4	1.4	0.7
- Financial net wealth	2,391						

Note: The data are based on the financial accounts in the national accounts and presented at market value. In the constant price calculations, the private consumption deflator from the national accounts is used.

1) Households in the Economic Survey include the NPISH-sector. 2)

Housing wealth includes land value and comprises all residences owned by households including rental property. The percentage increases include (as for other items) the growth of the housing wealth.

3) Household net position vis-a-vis banks.

4) Includes mutual fund shares and unlisted shares.

5) Not a complete account. Among other things, the household share of firms' capital (in single-person companies, excl. privately owned rental property, which is part of the housing wealth) is not included.

Collective as well as individual pension wealth (e.g. in banks). Adjusted for estimated deferred taxes.

Table B.17

Consumption and gross saving ratios

	2016	2017	2018	2019	2020
Per cent					
Households ¹⁾					
Consumption ratio (national account) ²⁾	94.7	94.7	93.8	93.8	94.3
Savings ratio (national accounts) ²⁾	10.5	11.8	13.4	13.7	13.1
- Savings ratio adjusted for return on pension assets ³⁾	9.2	9.4	9.8	9.8	9.2
Total private sector (national accounts)					
Consumption ratio	64.9	65.2	65.9	65.6	65.8
Savings ratio	35.1	34.8	34.1	34.4	34.2

1) 2) Households in the Economic Survey include the NPISH-sector.

According to the national accounts, the household consumption ratio is consumption expenditure relative to disposable income, while the savings ratio is gross savings relative to disposable income. As household gross savings include the return on pension assets, which is not included in disposable income, the sum of the consumption ratio and the savings ratio exceeds 100 per cent.

Savings adjusted for the return on pension assets (net of pension yield taxes), which is included in the na-tional accounts definition of household savings (but not income), *cf. note 2*. Pension contributions, net of pension payments, are included in savings as well as in income. In 2018 the repayment of contributions to 3) early retirement are included in income. Source: Statistics Denmark and own calculations.

Table B.18

Real estate market and construction					
	2016	2017	2018	2019	2020
Increase (per cent) in the price of traded single-family houses ¹⁾	4.0	4.0	4.2	3.3	2.5
Housing gross investment (real growth, per cent)	6.8	12.9	6.0	4.5	3.5

The increase is adjusted for developments in the volume of housing sales. 1) Source: Statistics Denmark and own calculations.

Table B.19

Labour wage ratio, wage increases and computational preconditions

	2016	2017	2018	2019	2020				
Labour wage ratio, per cent									
Private sector ¹⁾	57.5	57.6	58.9	59.2	59.4				
The entire economy ¹⁾	63.5	63.5	64.4	64.6	64.6				
Wage increase, per cent									
Private sector									
- Hourly earnings (excl. nuisance bonus)	2.3	2.2	2.5	2.8	3.0				
Public sector									
- Hourly earnings (excl. nuisance bonus)	1.9	2.1	-	-	-				
- Budgetary impact	1.3	1.7	1.6	1.8	2.8				
Wage adjustment rate, per cent ²⁾	1.4	2.0	2.0	2.0	2.2				

Note: The labour income ratio is calculated as aggregated labour income relative to the GVA (gross value added) and adjusted for the number of self-employed. The hourly wage increases in the private sector are published by The Confederation of Danish Employers. The hourly wage increases in the public sector are a weighted average of wage indices for the state, the municipalities and the counties, all reported by Statistics Denmark. No estimates are being reported on the development in public sector hourly earnings. The budgetary impact is based on the contractually agreed wage increases including contributions from the adjustment scheme (reguleringsordningen) and the regulation mechanism between the private and public sectors (privatlønsværnet), but excluding any residual increases. The hourly wage increases for the private and public sectors are not comparable.

 The labour wage ratio is in 2017 adjusted on a discretionary basis for a large one-off payment in the 1st quarter of 2017 for use of Danish-owned intellectual property rights. Thereby, growth projections are in line with the underlying growth.

2) In 2020 the estimate is based on the expected development in wages in 2018 and the effects from the agreement Aftale om ny regulering af folkepensionen og indførelse af obligatorisk opsparing for over førselsmodtagere. For the remaining years the known wage adjustment rate is stated.

Table B.20

Price trends and explanatory factors

	2016	2017	2018	2019	2020
Change, per cent					
Net price index	0.4	1.3	0.9	1.5	1.8
Tariffs and housing benefits, contribution	-0.2	-0.1	0.0	0.0	0.0
Consumer price index	0.3	1.1	0.9	1.5	1.8
HICP	0.0	1.0	0.8	1.4	1.8

Note: The contribution from tariffs and housing benefits is computed as the difference between the consumer price inflation and the net price inflation (to one decimal place). Changes in the prices of taxed goods such as energy can therefore influence the contribution from taxes, even though the tax level remains unchanged.

Total revenue ⁶⁾	1,081.7	1,117.8	1,122.1	1,138.7	1,166.8
General government budget balance	-1.5	25.6	3.9	-2.0	-3.0
Net interest expenditure	10.8	4.0	0.7	3.1	2.8
General government primary balance ⁷⁾	9.3	29.6	4.6	1.2	0.2

1) Other expenditures include capital transfers, transfers to the Faroe Islands and Greenland and the Danish EU-contributions.

2) Total expenditure differs from Statistics Denmark's equivalent. Total expenditure is calculated from a definition of the total expenditure, where all sub-elements of public consumption - e.g. imputed expenditure from depreciation and revenue from sales of goods and services - are defined as expenditures.

3) Personal income taxes include withholding taxes, tax on imputed income from owner-occupied dwellings, specific taxes from households, tax on estates of deceased persons and other personal taxes.

Other taxes include media license and mandatory pension payments for civil servants. 4)

Other revenues include profits from public enterprises, current and capital transfers from other domestic 5) sectors and the EU, and imputed (calculated) revenues such as contributions to civil servants' earned pension. Moreover, revenues from oil and gas explorations in the North Sea, duty on pipelines, and the hydrocarbon tax are included in other revenues.

Total revenue differs from Statistics Denmark's equivalent, where the sales of public goods and services 6) are counted as revenue and not - like here - counted as a part of the total expenditures. Furthermore, total revenue here includes a revenue-counterpart to the imputed depreciation expenditures included in public consumption.

The general government primary balance states the balance of the general government finances before net 7) interest expenditures.

In 2016 and 2017, the distribution of withholding taxes to the state and municipalities is from Statistics Den mark. For 2018-2020 an estimate is used based on the Ministry of Finance's tax base forecast. Includes equity income tax, tax on estates of deceased persons and revenue from the Danish business 1)

2) scheme etc.

Includes mandatory pension payments for civil servants in public enterprises etc.
